[www.adelekarmazyn.com](http://www.adelekarmazyn.com)

Adele is a York based Digital Photomontage Artist. Her love of antiques and oddities, old doors and weathered surfaces are the foundations of her work. Her ever growing collection of 19th century photographs is where she chooses her character and brings them back to full colour, intertwining them with creatures big and small, coupled with delicate foliage, she creates images both sophisticated and playful.

Her images are created using her digital camera, flat bed scanner and Photoshop. Bringing all the images together digitally, drawing on her experience with layering and affecting, she then prints the image on to Museum Heritage archival paper and continues to hand finish with inks, paint and sometimes gold leaf.

# Angela Stubbs

SELLING  
LIFESTYLE PHOTOGRAPHY

SEE MORE  
[www.angelastubbs.co.uk](http://www.angelastubbs.co.uk)

"Lifestyle photography is a modern approach which captures natural, relaxed images - it goes beyond what a child looks like and captures who they truly are at that particular moment in time. It does not rely on traditional poses, or props, but rather watches and waits for the special moments that define who they are as an individual or within a family.

Angela Stubbs Photography is all about a personal service (and professional results) that is as unique as your child. No two photographic sessions are the same as no two subjects are the same.

CONTEMPORARY CERAMICS

Ben has exhibited in Britain, Europe and America, his work is represented in public collections in Britain and Germany, and he is a fellow of the Craft Potters Association.

From the beginning of his career as a potter, Ben's pieces were always shallow, with trompe l'oeil illusions. For the first fifteen years his work was high fired stoneware in an oil reduction kiln, now he fires to an oxidised stoneware in an electric kiln to achieve cleaner, brighter colours.

HANDMADE LINOCUT PRINTS

SEE MORE

[www.janedignum.com](http://www.janedignum.com)

"I work in my studio in York and focus mainly on Linocuts although I do like to try out lots of printmaking techniques and also make collages from pieces of my prints. York and the Yorkshire countryside are sources of inspiration for my work as is my allotment and the wildlife that I see there.

I have been printmaking for about twenty years and taught myself to relief-print using just a few tools, lino, paper and ink. Then I completed a degree in Fine Art at Leeds College of Art. It was here that I was introduced to printmaking using all of the facilities that a print studio had to offer. Following this, I attended a Linocut workshop where I was introduced to the locally produced Hawthorn etching presses. I took the plunge, invested in a press and this was the real start of my printmaking journey."

"I studied Textiles and Surface Design at University Centre Somerset. I am a textile artist and Head of Textiles at a York secondary school. I am also a member of York Textile Artists and The Society for Embroidered Work which promotes and supports the best in stitched art worldwide.

The inspiration for my work mainly comes from the places I visit. I take photographs of anything that catches my eye as I like to capture a moment instantly.

I am inspired by rustic textures and the ageing process. I am drawn to anything corroded and tarnished and immediately see how it can be turned into a textile art piece. Colour and texture are the key elements in my work."

"My work includes pen and watercolour sketches from some of my favourite places along my travels, including York and Venice. Born in Yorkshire, I am both an architect and artist, living and working in the beautiful historic City of York.

I am inseparably an architect and an artist, and I am constantly observing my surrounding environment and I always carry a sketchbook and camera around with me.

I often stop to observe interesting buildings and features when I walk around, always looking up and often spotting a detail, as others may walk on by, seemingly unaware of their surroundings."
